

Molykote® G-4500 Synthetic Grease

High-performance grease that combines the benefits of wide operating temperature range and broad compatibility with varied materials. Thickened with an aluminium complex and contain white solid lubricants. Can be used to lubricate bearings, gears, chains and sliding mechanisms in food processing machinery.

COMPOSITION

- PAO Base Oil
- Aluminium Complex Thickener
- Fortified with Polytetrafluoroethylene (PTFE)

FEATURES & BENEFITS

- High Wear Resistance
- High Load Carrying Capability
- Low Temperature Performance
- Wide Temperature Range
- Good Plastics & Rubber Compatibility
- Food Industry NSF H1 Approved

APPLICATIONS

General purpose light consistency white synthetic grease can be used in rolling element and plain bearings, pivot pins, cams, guides, ways, drive screws, gears, splines and other machine elements.
